

Gapminder Guide

Gapminder.org presents live world data from the 1800s to present day in moving, interactive graphics. Students may look for evidence of the development (economic, health, etc) gaps amongst countries in the world today while encouraging interest in utilizing statistics to understand the problems and solutions of world issues.

Internet Version

Click on "Gapminder World" tab to access the graph below

- Select indicators for x and y axis
- Click play for development over time

- Every bubble is a country
- The size of the bubble corresponds with the population
- The color defines the region (see world map on right)

- Select one or more countries and play again
- Deselect a country
- Zoom into a country

- Use slider to change opacity of non selected bubbles
